

Jt. pfeiffer

Design Miami 2022

Miami Beach

Jt.Pfeiffer's collection of luxury art rugs is the outcome of a lifetime experience engaged in the design world, involving creative direction, interior design and visual communication. For Through & Through at Design Miami / 2022, Jt. Pfeiffer adds luxe texture with her sculptural rugs, delving into new colorways and forms, furthering the studio's exploration of abstract concepts in functional objects.

ANDELOOS

Andeloos, handmade in pure wool, gives the sensation of being submerged at the bottom of the ocean. Where the calm is only apparent, since there is a constant movement caused by the sea currents, in this case represented by the curves and countercurves of the upper part of the piece.

PACIFICOS

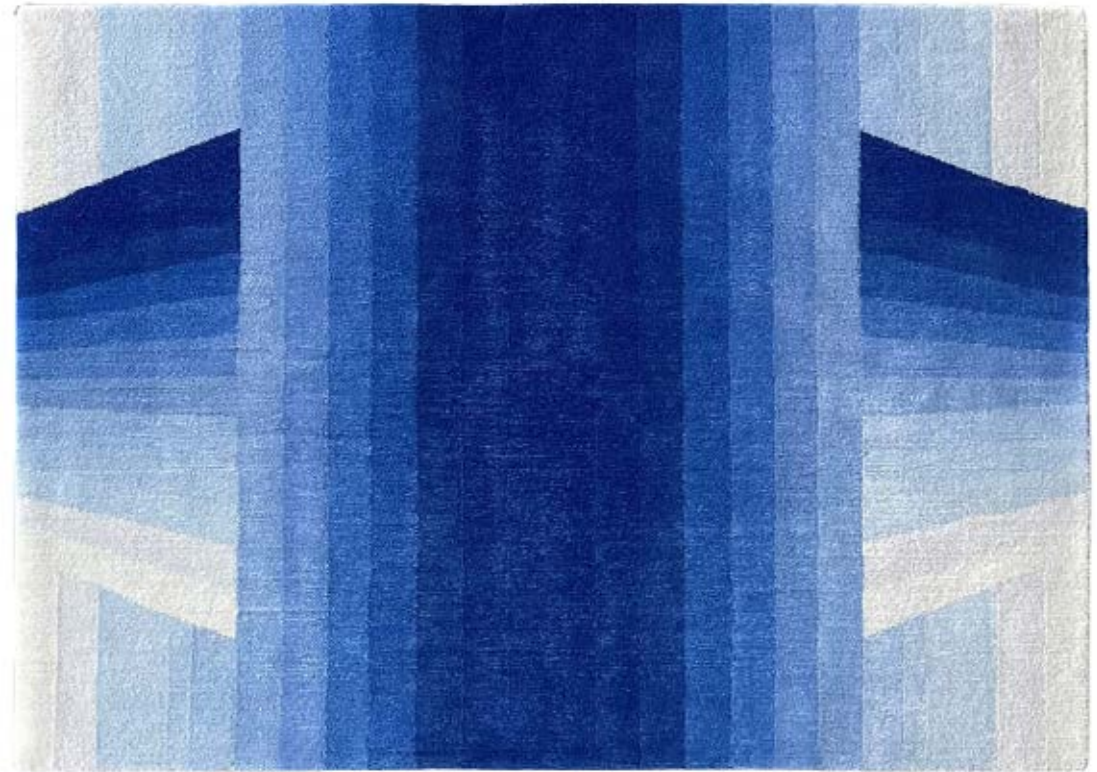

Pacíficos, Woven by hand in silk and wool, its curvilinear stripes articulated in the form of a gradient remind us of two human figures that subtly and peacefully lean gently against each other, merging with one another.

SKY REVOLUTION

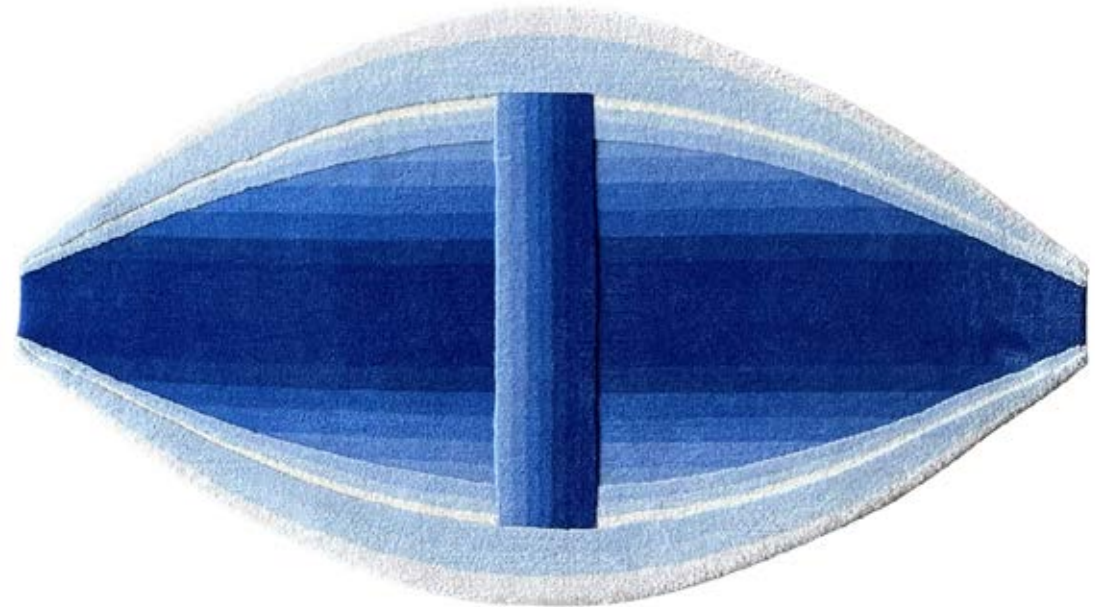

Sky Revolution, Hand knotted in silk and wool. Characterized by planes of color that appear and disappear as the viewer walks on it. At first glance, the piece does not reveal an image, but presents a sensitive geometry, where with its own language and with a play of chiaroscuro, it creates a new vision when moving around and surrounding the piece.

LUCY ROCKS

Lucy Rocks, Hand knotted in silk and wool. This tapestry invites you to inhabit each fiber through touch and feel and remember the deepest dreams that come from the imagination. Like a third eye that sees beyond the conscious plane. Generated by the different levels in the fabric, it is up to each one to find their own interpretation in this optical game.
